K 131 595 596 428 591 Tiya Polyandry. The Tiyas living in Malabar, exhibit one especially interesting phenomenon: they are a polyandrous people who are patrilocal (that is, the woman marries and goes to live with her husbands), but also matrilineal (that is, the property that they have—and they do not have much, because they are common laborers—is inherited from the mother's brothers). Unfortunately, I did not have much time to investigate these people because the war broke out when I had only been at work among them for three weeks. Thus, the only thing I could note was that they are polyandrous, patrilocal, and matrilineal at the same time. I should like to return and see how this works out.

Ti 123 To 123 K 123 *General Conclusions.* I am afraid that some of these results may seem superficial. I was unable to stay as long as I should have liked among all these peoples. I did not know any of their languages well, and to really do good field work, one would have to live among them and not put questions to them as I did. However, I hope to return and to do a more thorough study.

Ti 155 To 155 K 155 As far as the psychoanalytical results are concerned, I think that they are highly illuminating, though not sufficiently ample to be conclusive. There are strong indications that, broadly speaking, psychic mechanisms, libidinal development and mental structure may be identical to those in the West. There are, thus, numerous instances of trends pointing to Oedipus and castration complexes. What I, however, really investigated insufficiently was where we should place the relative borderline between what is specifically culturally determined in psychology (such as traits due to family environment) and what is generally humanly so (such as sociobiological traits).

K 595 182 To 595 182 Ti 595 182 As far as the ethnological results are concerned, these can be examined from two different angles. Functionally, polyandry fulfils the same purpose as all other marriages: it is a social institution for the satisfaction of the individual sexual in-
